

# EG4 BrightMount Cat1 Extension Rail Kit

## WEBSITE DESCRIPTION

Upgrade your BrightMount® Cat1 Solar Ground Mount with the EG4® BrightMount® Cat1 Extension Rail Kit, designed to support larger solar panels up to 44.65 inches (1134 mm) wide. By adding this extension, you can accommodate panels that exceed the standard system's limit of 43.3 inches (1100 mm). The kit increases the spacing between horizontal rail connection points, making it ideal for installations requiring greater flexibility.

Each kit includes a pair of extensions and supports one BrightMount rack. For guidance on installation, please refer to the BrightMount Adjustable Cat1 User Manual.

## SUMMARY OF FEATURES and BENEFITS

### Seamless Integration:

The extension kit seamlessly integrates with the BrightMount Cat1 Solar Ground Mount, ensuring a secure and stable structure for your solar panels.

### Effortless Installation:

The extension rail kits are designed for easy installation, allowing you to upgrade your system quickly and efficiently.

### Versatility:

Easily adapt your BrightMount Cat1 Solar Ground Mount to accommodate a variety of panel sizes, including wider panels up to 44.65 inches.

### Cost-Effective:

Avoid the need for a costlier system. The BrightMount Cat1 Extension Rail Kits offer a cost-effective solution for enhancing your solar array's panel options.
